

## NUCLEAR RECEPTOR TEST KIT

|  |   |   |                         |   |
|--|---|---|-------------------------|---|
| Thyroid receptor $\alpha$                                      | Nuclear hormone receptor HR96                               | Mineralocorticoid receptor                          | Endoderm                | Fungus                                  |
| Thyroid receptor $\beta$                                       | Nuclear hormone receptor HR1                                | Progesterone receptor                               | Air travel radiation    | Fungal toxin                            |
| Retinoid receptor $\alpha$                                     | Hepatocyte nuclear factor-4- $\alpha$                       | Androgen receptor                                   | Bluetooth               | Protozoa                                |
| Retinoid receptor $\beta$                                      | Hepatocyte nuclear factor-4- $\gamma$                       | Nerve Growth factor IB                              | Cell phone radiation    | Sporozoa                                |
| Retinoid receptor $\gamma$                                     | Retinoid X receptor- $\alpha$                               | Nuclear receptor related 1                          | Electric car batteries  | Trematode                               |
| Peroxisome proliferator-activated receptor- $\alpha$           | Retinoid X receptor- $\beta$                                | Neuron-derived orphan receptor 1                    | Geopathic radiation     | Nematode                                |
| Peroxisome proliferator-activated receptor- $\beta$ / $\delta$ | Retinoid X receptor- $\gamma$                               | Steroidogenic factor 1                              | Electromagnet radiation | Cestode                                 |
| Peroxisome proliferator-activated receptor- $\gamma$           | Testicular receptor 2                                       | Liver receptor homolog-1                            | Radioactive radiation   | Toxic Metal                             |
| Rev-ErbA $\alpha$  | Testicular receptor 4                                       | Nuclear hormone receptor fushi tarazu factor I beta | Laptop computer         | Radiation                               |
| Rev-ErbA $\beta$   | Homologue of the Drosophila tailless gene                   | Germ cell nuclear factor                            | TV radiation            | Chemicals                               |
| RAR-related orphan receptor- $\alpha$                          | Photoreceptor cell-specific nuclear receptor                | 9-Cis Retinoic acid                                 | Wireless router         | Resveratrol capsule                     |
| RAR-related orphan receptor- $\beta$                           | Chicken ovalbumin upstream promoter-transcription factor I  | 9-cis-13,14- Dihydroretinoic acid                   | X rays                  | Milk thistle extract capsule            |
| RAR-related orphan receptor- $\gamma$                          | Chicken ovalbumin upstream promoter-transcription factor II | Genotype  | UV A                    | Yellow dock extract capsule             |
| Liver X receptor- $\alpha$                                     | V-erbA-related  | Phenotype   | UV B                    | Silyclove capsule                       |
| Liver X receptor- $\beta$                                      | Estrogen receptor- $\alpha$                                 | Zygote  | UV C                    | Liposomal Glutathione caps              |
| Farnesoid X receptor   | Estrogen receptor- $\beta$                                  | Morula  | Waves / Microwaves      | Liposomal Glutathione + Taurine capsule |
| Farnesoid X receptor- $\beta$                                  | Estrogen-related receptor- $\alpha$                         | Blastocyst  | 5G                      | Liposomal Vitamin C caps                |
| Vitamin D receptor   | Estrogen-related receptor- $\beta$                          | Gastrula  | Bacteria                | Smart Vit D3 in Flaxseed oil            |
| Pregnane X receptor  | Estrogen-related receptor- $\gamma$                         | Ectoderm  | Acute Virus             | Smart Vit D3 in Olive Oil               |
| Constitutive androstane receptor                               | Glucocorticoid receptor                                     | Mesoderm  | Post Virus              | Potassium Iodide liquid                 |
